This letter to  
all Committee

February 24, 1922

new bus

Dr. Wade H. Frost,  
Johns Hopkins University,  
310-312 West Monument Street,  
Baltimore, Maryland.

My dear Dr. Frost:

You will recall that it was a part of the plan of the Committee to prepare a third section of the report which would consist of a series of summaries covering the important points in the practice of each one of the 83 cities studied. Because of the lack of funds and the inability of the individual members to further this project, no progress on this part of the report has been made.

More recently, Dr. Frankel has raised the question whether this was not after all, the most important part of the Committee's work. He is especially interested from the point of view of the Company in utilizing in a practical way the findings of the Committee on conditions in the individual cities. The Company would look with approval and help to support an active propaganda in those cities where it would be possible to do so to make good the deficiencies disclosed by the report.

I think the Committee could obtain financial support from the Company for the completion of this third section of the report. In fact, it would be possible to employ Dr. Haven Emerson to complete this work during the next three months. The Company is ready to finance this work, provided the findings were freely made available to it in order to carry out the promotion work in the individual cities in which it may be interested. Will you be good enough to let me know at your earliest convenience whether you favor such an arrangement between the Committee and the Company.

Very truly yours,
